

Why buy Contact's Forklift Hydraulic Sweepers?

Tested & Certificated:

All Contact's forklift rotary hydraulic sweepers are 'CE' marked, fully tested and and come supplied with Certificates of Conformity for compliance with Health & Safety regulations.

Powerful Sweeping:

With a powerful hydraulic drive Gerotormotor, Contact's hydraulic forklift sweepers offer a very effective sweeping solution, designed to meet the rigours of all site conditions.

Robust & Reliable:

Designed with a stable and rigid construction with enclosed machine casing, Contact's forklift rotary sweepers offer virtually dust free sweeping, in a 'fit for purpose' and resilient fashion.

Heavy Duty Brush:

To withstand the rigours of all types of sweeping environments, Contact's rotary sweeper comes supplied with a main steel/ppn mix heavy duty sweeping brush, offering long lasting and durable sweeping.

Collection Hopper:

To make sure the debris is swept up in a clean and tidy fashion, Contact's rotary forklift sweepers come supplied with a large volumetric collection hopper, easily operable from within the cab of the lift truck.

Simple Fitment:

Only requiring one hydraulic service to operate, Contact's hydraulic forklift sweepers are easily connected to the hydraulic systems of the forklift truck. Once initial configuration has been set up, utilising BSP quick release couplings, a simple 'plug in' and 'plug out' connection can be adopted.

Versatile In Operation:

Adjustable height, 200mm x 50mm, support wheels with dust caps allows Contact's hydraulic forklift sweepers to be versatile across all terrain types.

We hope the above helps demonstrate the quality and features of a Contact hydraulic forklift sweeper, and welcome the opportunity to supply you with a high quality forklift sweeper to suit your sweeping operations.
