

Why buy Contact forklift snow ploughs ?

No Quibble Guarantee:

If you are dissatisfied in any way with your Contact forklift snow plough's performance, return it to us, and we will refund you in full.

Tested & Certificated:

All Contact's forklift snow ploughs are 'CE' marked, fully tested and and come supplied with Certificates of Conformity for compliance with Health & Safety regulations.

Design For Strength:

A Contact forklift snow plough has undergone stress analysis checks that makes sure all weak points that may occur during heavy snow ploughing operations are eliminated.

Steel Blades For Heavy Duty Operation:

All Contact's snow ploughs for forklifts, are manufactured from durable 6mm thick steel, making them ideal for ploughing frozen compacted snow. In additional, for added service life, all snow ploughs come fitted with 10mm thick steel (replaceable) wearstrips.

Rolled Blade Design:

To allow for efficient snow ploughing, all Contact's forklift snow ploughs are designed with a rolled blade. A rolled blade design ensures snow rolls away from the snow plough blade in an effective and efficient manner.

Rubber Blade Inserts:

When choosing a Contact snow plough attachment, our fixed blade snow plough can come supplied with a rubber blade insert as an option, whereas our Adjustable and Sprung Loaded snow ploughs have rubber blade inserts fitted as standard. This rubber blade acts as a form of protection to the snow plough blade, when ploughing over rough ground or over ground with raised objects (drains etc). The rubber blade insert also contributes to a longer service life of the snow plough blade.

Available In Various Specifications To Suit Your Needs:

Whatever the type of snow plough attachment you are looking for, Contact has a snow plough to suit your needs. From a fixed blade design for simple yet effective snow ploughing, an adjustable blade design, with left, right or centre blade positioning, to a Sprung Loaded design with shock absorbing springs, you can be assured we have a snow plough attachment to suit your requirements.

We hope the above helps demonstrate the quality and features of a Contact forklift snow plough, and welcome the opportunity to supply you with a high quality snow plough attachment that will assist in your snow ploughing needs.
