

Raised Fork Mounted Drum Handler

Our best selling drum handler has a fully automatic action. The attachment has two curved arms which hinge at one end. To lift a drum, approach it with the clamp arms horizontal and positioned halfway up the drum, between two rolling hoops. When the arms contact the drum they will open automatically, falling back around the drum as you proceed forwards. When the attachment is raised the arms will grip the drum tightly under the upper rolling hoop.

Raised position of the arms of this drum grab gives improved visibility and increased lift height for the plastic drums

Model Ref:	Max SWL (kg)	Max Fork Size (mm)	Fork Spread (mm)	LCC (mm)	C of G (mm)	No of Drums	Drum Types	Weight (kg)
