

## Tele-Liner Jib (LLX)

Our Tele-Liner jib offers a solution to the handling of previously inaccessible loads. To fit; simply remove the attachment heel pin and drive the truck slowly forwards until the forks are fully sleeved. Then simply re-fit the heel pin behind the forks of the truck. Ensure the jib is fully secured before lifting commences.

CONTACT Tele-Liner jibs are an inexpensive jib that gives longer reach capabilities for picking up products that are un-palletised or for handling motors, press tools etc, from normally inaccessible positions. Has the added feature of a mechanically extendable inner section of extra reach. Supplied with two hooks and shackles.

Model Ref.	Weight	C of G Min	C of G Max
LLX 500-1.8	124kgs	763mm	960mm
LLX 500-1.8 BP	140kgs	735mm	900mm
