## Roll Forward Lidded Skips

*Our best selling tipping skip. This skip can be used for a wide variety of applications and therefore makes it a popular choice for waste handling. Designed to be placed in production areas, Roll Forward skips keep working areas clear and allow safe and speedy removal of scrap or rubbish to the appropriate waste receptacle. All skips have unique twin locks and simple to operate release mechanism, all skips also come with a retaining security chain for fastening to the truck. Full lids are fitted to prevent rubbish blowing about and reduce odours. The front of the lids folds back over the fixed rear portion*

Roll Forward Skips come with the benefits of having a full length release handle accessible from either side; this eliminates the need to lean dangerously over the skip to activate it. This also means the skip can be tipped if positioned alongside a wall. Drilled castor plates allow for retro-fitment if required.

Max Fork Size 150 x 65mm
