

Product Guide Sheet

Roll Forward Packaging Skips

Our best selling tipping skip. This skip can be used for a wide variety of applications and therefore makes it a popular choice for waste handling. Manufactured by adding 500mm mesh height extensions on three sides to give higher volumetric capacity and added rigidity without a significant increase in weight. Ideal for high volume, low weight material, such as paper, cardboard, packaging materials etc. Manufactured in 3mm mild steel. Complete with the unique twin locks for safety and simple to operate release mechanism. Safety chain truck retention fitted as standard.

Roll Forward Skips come with the benefits of having a full length release handle accessible from either side; this eliminates the need to lean dangerously over the skip to activate it. This also means the skip can be tipped if positioned alongside a wall. Drilled castor plates allow for retro-fitment if required

Model Ref.	Volume	Capacity	Overall Height	Weight (kg)
RFS 40LP	0.7m ³	1000kgs	1281mm	140
RFS 80LP	1.4m ³	1000kgs	1334mm	180
