

Adaptor Carriage - AC

The AC adaptor carriage hangs on the existing forklift carriage to convert its class (e.g., Class 3 to Class 2), allowing use of different attachments on the same truck. This provides flexibility without replacing the carriage.

Manufactured from high-quality 50D Boron steel for excellent abrasion resistance and reduced top rail wear from fork sliding.

Available in multiple widths and classes – CE-marked with full documentation for safety and compliance.

Model Ref	Carriage Width (mm)	To Suit Existing Carriage Class	Adaptor Carriage Class	Lost Load Centre (mm)	Weight (kg)
AC2-1000	1000	3	2	60	108
AC2-1200	1200	3	2	70	126
AC3-1000	1000	4	3	70	124
AC3-1200	1200	4	3	70	144

Compatibility & Fit:

Suits Class 2,3 and 4 carriages
 Hang-on design - quick to install/remove
 Maintains forklift stability and capacity
 Custom widths available

Features & Benefits

- Converts existing carriage class for compatibility with different attachments
- High-quality 50D Boron steel – high abrasion resistance reduces wear
- Custom widths available for exact site requirements
- Simple hang-on design – quick to fit and remove
- CE-marked with full health & safety documentation
- Simple hang-on design – quick to fit and remove

Typical Applications

Handling oversized pallets or loads

Multi-fork operations for long materials

Warehouse and distribution centres

Manufacturing & fabrication sites

Heavy industrial & steel handling

Compatibility Quick Guide

Existing Class	Converts To	Common Use Case
Class 3	2	Smaller forks or lighter attachments
Class 4	3	Medium-duty handling
Any	Custom	Specialised wide-load setups
