

Fork Extensions - Heavy Duty

Fork Extensions provide a simple and effective temporary solution when extra reach or load stability is required. Manufactured from durable 6mm thick steel, these heavy-duty extensions are value-engineered for performance, quality, and safety at a competitive price.

The pressed folded channel design on the underside adds strength and prevents the extensions from riding up the back of the forks.

Rounded tips and removable heel pins make them easy to use while complying with manual handling regulations.

Model Ref	To Suit Max Fork Section (mm)	Extension Length (mm)	SWL @ Load Centre	C of G (mm)
EFEX-100-1800	100 x 50	1800	4000kg @ 500mm	807
EFEX-100-2000	100 x 50	2000	4000kg @ 500mm	907
EFEX-125-1800	125 x 50	1800	5000kg @ 500mm	815
EFEX-125-2000	125 x 50	2000	5000kg @ 500mm	915

IMPORTANT SAFETY NOTES:

Fork extension length should not exceed existing fork length by more than 66%
 Always use the removable heel pins for secure attachment
 Never exceed the rated SWL at the specified load centre
 Regularly inspect for wear or damage before use

Features & Benefits

- Manufactured from durable 6mm thick steel for maximum longevity
- Pressed folded channel underside – additional strengthening and prevents riding up
- Rounded tip profile for easy entry into loads or pallets
- Removable heel pin – drive-in entry, no manual handling required
- CE marked with Certificate of Conformity for health & safety compliance

Weight (kg)

Typical Applications

Reaching into deep racking or containers

Handling long or oversized loads

Loading/unloading high-sided vehicles

Construction & steel fabrication

Warehouses with deep storage
