

Mauser Drum Grab

The Mauser drum grab is specially designed for safe handling of 'egg-shaped' 210-litre plastic drums. Its automatic grip secures the drum at the base, with an upright support for added stability during lifting.

Ideal for tapered drums where base diameter is smaller than the top. Large fork pockets allow simple drive-in operation.

Choose the Mauser drum grab for reliable, hands-free drum movement with minimal maintenance.

Model Ref	FDHM-1	FDHM-2
Capacity (kg)	400	800
No of Drums	1	2
Drum Type (210 Litre)	Mauser	Mauser
Max Fork Size	130 x 70	130 x 70
