

Wheelie Bin Handler - 90 to 240 Litre

The Fork Mounted Wheelie Bin Handler is designed for safe and efficient handling of 90–240 litre wheelie bins with free-swinging lids and rear lifting handles. It allows the operator to lift, move, and empty bins remotely without leaving the forklift cab.

Ideal for warehouses, factories, and sites requiring frequent bin emptying while improving operator safety and productivity.

Model Ref	SWL	To Suit Wheelie Bin Size	Max Fork Size	Fork Spread
FM-WBH	360kg	90 - 240 Litre	140 x 60mm	500mm (o/s - o/s)

Operation Guide

Step	Description
1	Drive forks fully into the attachment pockets until engaged
2	Wrap the retaining chain around the forklift carriage and secure it
3	Position the ratchet clamp onto the outside of the cab and tighten firmly
4	Approach the wheelie bin from the rear and engage the lifting hooks
5	Lift the bin and transport to desired location
6	Tilt the mast forward to empty the bin safely from the cab
7	Lower the empty bin and disengage the hooks

Typical Applications

Warehouses & distribution centres

Manufacturing & factory sites

Retail & supermarket back areas

Hospitals & healthcare facilities

Schools & educational campuses

Councils & waste management operations

Features & Benefits

- Handles 90–240 litre wheelie bins with swinging lids and rear handles
- Fully remote operation – no need to leave the forklift cab
- Secure fork pocket mounting with retaining chain
- Ratchet clamp for stable attachment to the cab
- Robust construction for reliable daily use
- Improves operator safety and handling efficiency
