

Wheelie Bin Lifter - 240 Litre

The Wheelie Bin Lifter is designed to safely lift and stack 240 litre wheelie bins with a maximum capacity of 500kg. It allows operators to handle multiple bins efficiently without manual lifting, significantly reducing injury risk.

Simple to attach via forklift forks with heel pin retention, this attachment is ideal for warehouses, distribution centres, and industrial sites where frequent bin movement is required.

Model Ref	SWL	To Suit Wheelie Bin Size	Max Fork Size	Fork Spread
FM-WBL	500kg	240 Litre	140 x 60mm	800mm (o/s - o/s)

Operation Guide

Step	Description
1	Drive forks fully into the attachment pockets
2	Secure with heel pins for safe retention
3	Position the lifter behind the wheelie bin(s)
4	Engage the hooks under the rear lifting handles
5	Lift the bin(s) smoothly and transport to desired location
6	Stack bins safely as required
7	Lower and disengage hooks to release

Typical Applications

Warehouses & distribution centres

Manufacturing & factory sites

Retail & supermarket back areas

Hospitals & healthcare facilities

Schools & educational campuses

Councils & waste collection operations

Features & Benefits

- Specifically designed for 240 litre wheelie bins – the most popular size
- Lifts and stacks multiple bins safely from the forklift seat
- Reduces manual handling and associated injury risk
- Simple operation with few moving parts for low maintenance
- Fork 'T' screw retention for secure attachment
- Robust construction for reliable daily industrial use
