

Designed to be slung from the hook of an overhead crane.

When working at height is a requirement, our crane slung safety platforms provide a safe working deck to carry out such operations

With two methods of entry to choose from (through bars or side gate) you can be assured personnel can carry out their working at height in a safe and risk free manner

Supplied with lifting chains and safety harness

Model Ref	Method of entry	Max No of People	Dimensions (L x W x H) mm	Capacity (kg)
FWP-CS-S	Through bars	4	1100 x 1500 x 2159	500
FWP-CS-G	Side gate	4	1100 x 1500 x 2159	500
