

GasGrab Gas Bottle Lifting Bracket

GasGrab is a patented scissor-action clamp designed to allow safe, ergonomic lifting of gas bottles, significantly reducing the risk of back strain and injury. It promotes the correct body posture for lifting.

Suitable for one-person lifts (short distances) or two-person lifts (recommended for longer carries). Light, rigid, and fully certified.

Available in multiple diameters and colours to match common gas bottles – the safe, efficient way to handle cylinders.

Model Ref	To Suit Gas Bottle Diameter (mm)	Colour
GasGrab-100	100	White Gloss
GasGrab-140	140	Black Gloss
GasGrab-178	178	Light Grey
