

LOADING MIRROR

GenieGrips® Loading Mirrors for forklifts eliminates critical blind spots in the drivers vision and gives a clear view of the tynes, reducing accidents, injury and damage to goods.

Easily fitted to the mast, they are more reliable, easier to use and more robust than camera systems and gives a bigger, intuitive field of view – like a car mirror system, only looking forwards.

The GenieGrips® Loading Mirrors take the guess work out of truck loading enabling drivers to load trucks in one safe, efficient movement. Drivers can see to align the load with the bed of the truck.

GenieGrips® Loading Mirrors are a forward view mirror system designed for forklifts.

It allows drivers to sight the tynes and see around the load, significantly improving safety and reducing damage to goods and infrastructure.

- Sight tynes
- See around the load
- Improve safety and efficiency
- Reduce damage
- Easily installed
- Reduce driver strain/injuries

GENIEGRIPS® LOADING MIRROR IMPROVES SAFETY AND EFFICIENCY WHEREVER FORKLIFTS ARE USED.

GET A GRIP

GenieGrips® Loading Mirrors | Slimview
