

Multi Sweep 500 Telehandler Sweeper

The Multi Sweep 500 is a high-capacity hydraulic telehandler sweeper for demanding yard and road cleaning. It combines a main brush with side brushes for wide coverage, collecting debris into a 500-litre hopper.

Hydraulic drive ensures reliable performance with no belts or chains. Easy attachment and operation.

Perfect for industrial sites, construction yards, and large outdoor areas needing thorough, efficient sweeping.

Model Ref	Sweeping Width (mm)	Hopper Capacity (Ltr)	Hydraulic Flow Required (Ltr/Min)
Multi Sweep 500	2200	500	25 - 30
Water Tank Capacity (Litre)		218	

Typical Applications

Construction sites & building compounds (heavy rubble, aggregate, mud)

Agricultural yards & farm operations (soil, grain spills, silage areas)

Quarries & aggregate handling sites (stone, gravel, dust)

Large industrial yards & recycling centres (bulk waste, metal debris)

Demolition & waste transfer stations (heavy mixed debris)

Telehandler-operated outdoor cleaning (loading bays, hardstandings)

NOTE: Water Spray System (218 Litre), gravity-fed, fitted as standard

Weight

Min Unladen - 600kg

Max Unladen - 900kg

Optional Extras

Poly/Wire kerb side brush

Diesel power pack engine

Features & Benefits

- Hydraulic drive – no belts/chains, reliable and low maintenance
- Wide 2200mm sweeping path for faster coverage
- Large 500-litre hopper for extended cleaning sessions
- Fully enclosed skirting ensures debris is contained
- Floating broom system adapts to rough terrain
- Easy forklift attachment – quick setup and removal
- Robust construction for demanding industrial use
