

Pedestrian Salt Spreader

The PPS-50L pedestrian salt spreader is ideal for gritting pathways, walkways, and access areas during ice.

With large pneumatic tyres for easy movement and a 50-litre non-corrosive hopper, it keeps operations safe and moving through winter.

Simple yet effective, it features a robust flow regulator and solid linkage for reliable performance. Includes durable plastic rain cover.

Measurements	Overall Length (mm)	Overall Width (mm)	Overall Height (mm)
PPS-50L	1100	800	770
Tyres			
Pneumatic	330mm		
Gears			
Heavy-Duty	Stainless Steel		
Construction			
Steel Frame	One-piece fully welded with ergonomic handle		

NOTE: The PPS-50L Pedestrian Salt Spreader is only suitable for free flowing fine granular white rock salt

Capacity (Ltr)

50

Weight (Kg)

20

Features & Benefits

- Non-corrosive 50-litre hopper
- Substantial flow regulator powered by heavy-duty stainless steel gears
- Large 330mm pneumatic tyres for easy movement
- Solid control linkage eliminates sticking and stretched cables
- Fitted with deflector plates to control spread pattern – ideal for pathways
- One-piece fully welded steel frame with ergonomic handle
- Durable plastic rain cover protects salt from moisture and spillage
