

Heavy-Duty Pedestrian Snow Plough

The PSP-1000-HD heavy-duty pedestrian snow plough features an adjustable blade (0° to 30° left-hand sweep) for efficient clearing of driveways, paths, and pavements. Its simple trolley design keeps your body upright, using bodyweight, arms, and legs to reduce back strain.

Blade adjusts easily on a 50mm pitch with 6 settings via fly nut and bolt. Angled design lets snow slide off smoothly.

Built tough with mild steel and high-quality epoxy finish for long-term durability.

Measurements	Blade Width (mm)	Blade Height (mm)
Blade Dimensions	1000	330
Overall Height (mm)	1000	
Overall Depth (mm)	1140	
Weight (kg)	28	

Typical Applications
Residential driveways and garden paths
Business premises walkways and entrances
Side passages and narrow access areas
Car parks and small spaces
Schools, hospitals and care facilities

Aspect	Pedestrian Plough	Conventional Shovelling
Back Strain	Minimal – uses legs and bodyweight	High – repeated bending and lifting
Clearing Speed	Twice as fast – bi-directional blade	Slower – one direction only
Effort Required	Half the effort – angled blade slides	Full manual scooping
Adjustability	0° to 30° blade sweep – 6 settings	None – fixed angle
Durability	Mild steel + epoxy finish	Plastic/wood – prone to breakage

Features & Benefits

- Adjustable blade (0° to 30° left-hand sweep) for versatile clearing
- 6 adjustment settings on 50mm pitch via fly nut and bolt
- Upright operation reduces strain on lower back
- Angled blade allows snow to slide off easily
- Mild steel construction with high-quality epoxy finish
- Robust design for heavy-duty use
