

Forklift Snow Socks

Forklift snow socks are the perfect winter solution to keep your forklift moving on slippery surfaces. These heavy-duty ribbed textile wheel covers fit quickly and easily over driving wheels, providing instant grip without the hassle of chains.

Cheaper, lighter, and simpler to install than traditional snow chains. Reusable until worn, with minimal weight (less than 1kg per sock).

Supplied with elbow-length gloves for clean fitting. Ideal for indoor and outdoor winter operations. Increase efficiency and protect their equipment.

Model Ref	Tyre Size (Inches)
AF12	18 x 7-8
AF16	6 x 9
AF16	6.5 x 10
AF20	7 x 12

Model Ref	Tyre Size (Inches)
AF24	8.15 x 15
AF24	28 x 9 - 15
AF28	8.25 x 15
AF32	355/65/R15

Typical Applications

Warehouse loading bays and cold stores

Outdoor yards and distribution centres

Retail parks and access roads

Manufacturing sites with winter deliveries

Construction sites and temporary access routes

Fitting

Stop forklift. Apply parking brake. Fit AutoSock from top of tyre down. Drive forward ~½ metre. Pull the rest of the sock into place.

Use

No need to turn off traction/stability systems (ETS, ASR, ESP, DSC). Drive gently to avoid wheel spin. Extreme acceleration or braking may damage the product

Removal

Remove AutoSock from wheels, shake off snow, and store in pouch for washing or later use.

Features & Benefits

- Quick and easy fitment – before or after the forklift gets stuck
- Reusable until worn – excellent service life with sensible use
- Lightweight (<1kg per sock) – minimal impact on forklift performance
- Heavy-duty ribbed textile for reliable grip on ice and snow
- Supplied with elbow-length gloves to protect clothing
