

Fork Mounted Plastic Bin Tipper

Large plastic storage containers, tubs and bins are frequently utilised for waste management, but the challenge lies in how to empty them.

This innovative forklift attachment enables easy handling and tipping of these 455 litre mobile truck bins. With an adjustable retaining arm designed to accommodate various bin heights, the attachment provides a swift and efficient solution for managing these storage tubs.

Webbing and ratchet straps securely hold the bin in place, while the premium gearbox facilitates smooth forward tipping and emptying via a connected loop chain

Model Ref	Capacity (kg)	To Suit Bin Size (mm)	Max Fork Size (mm)	Fork Spread (mm)	Weight (kg)
FM-PLASTIC-BIN-TIPPER	500	770W x 785H	140 x 65	800 (o/s-o/s)	189

Features & Benefits

- Simple operation allows the plastic bins to be tipped and emptied without manual handling, thus reducing risk of injury
- High quality gearbox allows for forward rotation and tipping of the plastic bin
- Loop chain facilitates tipping at height
- Webbing and ratchet straps for safe and secure holding of the plastic bin
