

Bale Spikes

Our Bale Spike range is made up of 6 models, each one specific to the number of bales which wished to be moved. Each model is based on a heavy duty wall, box section form with KV type tines. Tines are bushed into the box section frame to help reduce them coming loose.

As standard, all models come with mounting brackets welded on to suit your telehandler or loader.

Model	Will Handle	Capacity	Width	Height	Depth
CN27	1 x Round Bale	500kgs	1270mm	810mm	980mm
