

Flat Bale Grabs

Our Bale Handling range is built specifically to suit your existing bale sizes. We use proven bale claws which work in unison for a trustworthy pick up.

Our standard range is made up of the five grab types, but we can accommodate any bale size you may have. If you would like any further information on our bale grab range or compatibility options, please contact our sales office. Brackets and Pipework are included as standard.

Model	Will Handle	Capacity
CH25	8 x Conventional Bales (Flat 8)	1000kgs
CH25A	10 x Conventional Bales (Flat 10)	1250kgs
CH26	2 x 800mm Wide Bales / Flat 8 Conventional Bales	1000kgs
CH26B	3 x 800mm Wide Bales / 2 x 1200mm Wide Bales	1500kgs
CH26BLB	3 x 1200mm Wide Bales	1800kgs

Features

Claws, casted rather than profile cut – helps reduce the chance of breaking bale strings

Brackets, integral to the strength and design of the attachment. Make up the main framework

High Capacity Ram(s), whether single or double, allow the tines to enter bale simultaneously for secure pick up

Guide Rail,. Can be fitted both sides. Allows tight stacking of bales
