

Big Bag Lifters

Our range of Bag Lifters gives a safe, efficient and quick option for moving big bags. The design allows for extra height to be gained, maximising the efficient load space when loading or unloading curtain sided lorries.

The hydraulic Adjustable Bag Lifer is the most versatile bag lifter available. A single hydraulic cylinder allows you to adjust the arm centres from the comfort of the cab. The perfect solution if you have a mixture of 600kg and 1000kg bags

Fixed Arms

Model	Bag Type	Arm Centres	Height	Depth	Kilos
CAB02	600kg / 1000kg	850 / 1270	1140	2300	280

Hydraulically Adjustable Arms

Model	Bag Type	Arm Centres	Height	Depth	Kilos
CAB03	600kg/1000kg	850 / 1270	1140	2300	290

Features

Stopping Blocks, prevent bags from accidentally sliding off the end of arms

Swing Protector, prevents bags swinging when in transit and subsequently splitting

Arms, built at a length & spacing for easy stacking

Brackets. Integral to the design and strength of the Bag Lifter

Support Gussets, run under main arms to provide extra strength
