

Digging Buckets (Telehandler Models)

This range of Heavy Duty Digging buckets matches the profile and shape of the Rolled Rehandling Bucket but it is built to a much higher specification. Where our standard buckets are made from 5mm plate, this digging bucket is made from 6mm, has full length side gussets, 130 x 12mm heavy duty side stiffeners and extra wear plates on the underside. All models come as standard with a bolt on reversible toe plate. Alternatively, digging teeth can be fitted upon request.

Model	Width	Height	Depth	m ³	CuFt	Kilos
CB23W	2450 (8')	750	770	0.89	32	400
CB24W	2450 (8')	840	1000	1.50	53	550
CB23	2286 (7'6")	750	770	0.84	30	360
CB24	2286 (7'6")	840	1000	1.41	50	510
CB23A	2133 (7')	750	770	0.79	28	340
CB24A	2133 (7')	840	1000	1.30	46	490
CB235	1980 (6'6")	750	770	0.73	26	330
CB245	1980 (6'6")	840	1000	1.21	43	475

Features

Support Straps, 150 x 12mm run continuously around/through the bucket

Side Gussets, full length, adds strength whilst protecting against material sticking

Side Stiffeners, 130 x 12mm ultra heavy duty down either side

Leading Edge, protects against undue wear and tear, bolt on reversible

Rolled Profile, reduces amount of material able to stick to the back of the bucket
