

Low Profile (Potato) Buckets

Contact's range of Potato/Low Profile Buckets are very long in the floor, so the operator does not have to drive too far into a pile of potatoes to obtain a full bucket. This can help minimise crop damage. It is made with smooth edges (from 25mm round bar) which again helps to reduce damage. We can also, upon request, cut away the sides of the bucket, once again to reduce crop damage. This can be done by adding bolt on sides if a 'complete' bucket is needed for other requirements.

Model	Width	Height	Depth	m ³	CuFt	Kilos
CB12W	2450mm (8')	736	1219	1.50	53	520
CB13W	2450mm (8')	890	1320	2.11	74	600
CB12	2286mm (7'6")	736	1219	1.41	50	500
CB13	2286mm (7'6")	890	1320	1.98	70	570
CB12A	2133mm (7')	736	1219	1.30	46	495
CB13A	2133mm (7')	890	1320	1.84	65	530
CB125	1980mm (6'6")	736	1219	1.21	43	475
CB135	1980mm (6'6")	890	1320	1.61	60	519

Extras

Model	Description
TP27	Bolt on reversible tow plate
BG01	Full width spill guard
BG02	Half width spill guard
DL03	Internal corner gussets
DL04	Internal full length gussets
