

Heavy Duty Fork & Grab (For 2 Tonne Machines)

Our CF06 range of fork and grabs are the ideal attachment for users who want a compact, but heavy duty grab for their 2-3 tonne machine.

Similar to its bigger counterpart, the CF07, the CF06 range utilises high capacity rams, high grade pins & a wide open grab to give users a reliable attachment for a multitude of jobs

Model	Width	Height	Depth	m ³	CuFt	Kilos	Tines	No
CF06HDW	2450 (8')	1062	1010	1.98	70	660	Hardox	10

Features

Tine Options, to suit your application, we offer a choice of KV style, Hardox or 2" round base tines and KV style or Hardox Grab tines. All KV style tines are bushed in the frame

Fork Back, as standard built with 'tube style' for maximum strength and viability. However we can build with middle plated or the whole fork back plated

Grab Stop, are fitted for the opening and closing of the grab to protect the hydraulic cylinders

Brackets, integral to the design and strength of the attachment

Wide Opening Grab, 1520mm vertical height
