

Pallet Fork Carriages

We have a host of Pallet Fork Carriages to suit a variety of Pallet Forks and Machines. For industrial type pallet forks, our CP39 and CP40 carriages are available.

For forks which fit over a fixed bar (E.g. Merlo Forks), we have our CP32 and for forks that fit on a floating bar (E.g. JCB Forks), we have our CP41.

All Pallet Fork Carriages come with brackets as standard with the option of being supplied with our without the pallet forks they are designed to carry

Model	Description	Capacity	Width	Height	Depth
CP39EC	Class ITA 2	1500kgs	1000	400	55

Features

Spread, all of our carriages are as wide as possible, allowing a wide spread of the forks

Strength, built to the highest standards, our carriages are built to maintain as much of the machines lift capacity as possible

Quick and Simple, built with brackets as standard, our carriages can be easily detached when you want to use an attachment

Compact, designed and built to be as compact as possible to your machine, helping to keep your load centres as close as possible
