

Snow Blades

The CBSP80 range of Snow Blades are designed to the low-mid intensity user, either of a loader, telehandler or linkage. The 8mm folded front blade is accompanied by a 50mm thick yard scraper rubber edge.

The blade can be specified with either manual adjustable angling or hydraulically adjustable angling. All models have the option of height adjustable wheels & tyres which are set on individual stub axles

Model	Description
CSP80/A	Snow blade manually adjustable to the left or right
CSP80/HYD	Snow blade hydraulically adjustable to the left or right

Features

Blade Angle, allows snow to fall freely away to the side of the plough

Adjustable Blade Angle, hydraulic or manual options

Rubber Edge, hard wearing, standard on all models

Models for all. Whether you want to clear your drive, or take the plough to the road, we have models to suit all applications and budgets
