

Auto Grip (FDH-6145)

The Auto Grip mechanical forklift attachment is equipped with standard jaws that are spring-and-cam actuated and grip with pressure equal to the weight of the drum.

The unit is quick and easy to attach to the forklift and allows a single operator to pick up, transport and unload empty or full drums up to 680kgs.

Model	Max SWL	Drum Diameter Range	Max Fork Size	Suitable For Drum Types	Weight
FDH-6145	680kgs	460 – 710mm	140 x 50mm	1 & 2	46kgs

Features

Rubber-lined jaws that adjust to fit most smooth sided drums or cylindrical objects 460-710mm diameter

Heavy Duty T Screws secures the drum handler safely to the fork truck forks

Adjustable jaws via turnbuckle allows the jaws to be adjusted to suit different diameter ranges

Suitable for use with 210 litre steel drums and 210 litre 'L' ring & 'XL' ring plastic drums.

Please Note: The drum handler is not suitable for use with Fibre drums because they can easily lose their shape when gripped
