

Hydraulic Drum (FDH Series)

Suitable for both 210 litre steel and plastic drums, and with versatile hydraulic clamping function, this drum handler is perfect for handling mixed type drums and for when high volume movement of drums is required

For added grip and non-marking benefits, the jaw arms of the hydraulic drum handler are coated with shore 60A polyurethane.

Fitted with a double ended dual acting cylinder ensuring the arms open evenly each side, the hydraulic drum handler also has a pressure relief valve for finite adjustment to its clamping power

Model Ref	Capacity (kg)	Max Fork Section (mm)	Fork Spread (mm)	C of G (mm)	Weight (kg)
FDH-1-HYD	500	150 x 60	650	816	122

The perfect solution to drum lifting and drum turning

- ✓ Suitable for use with 210 litre steel and plastic drums
- ✓ Hydraulic operation for quick and easy drum handling
- ✓ Non-marking Shore 60A Polypropylene coating to inside of jaws
- ✓ Double ended dual acting cylinder ensures jaw arms open evenly
- ✓ Pressure relief valve offers finite adjustment to the clamping power
- ✓ Ample sized fork pockets to suit most fork trucks
- ✓ **CE**marked and supplied with Certificate of Conformity
