

Rim Grip Drum Handler (PB-GG)

Easy to operate, this drum handler allows quick, safe and efficient drum handling capabilities, with no hydraulic or electrical connection required to your forklift truck

Suitable for use with steel or plastic drums, the gripping head function of this drum grab allows drums to be handled via the lip.

Features

- Suitable for use with 210 litre steel drums and 'L' & 'XL' ring plastic drums, allows these common drums to be handled with no risk of injury
- Strong 'Parrot Beak' gripping mechanism reduces dangerous and costly spillages and drum damage
- Hard steel gripping head for a long service life with low maintenance and operating costs
- Ample sized fork pockets to suit most fork trucks, no need to risk back strain through manual handling
- Freestanding allows quick and easy fitment on and off the forklift with heavy duty zinc plated screw clamps for safe securing
- Fully automatic in operation, reducing time and labour costs
