

High Lift Jib (HLJ)

Our High Lift Jib simply fits to the forktruck in the following way; Simply remove the bottom hangers found on the battachments backplates, via the nuts and bolts or the quick release pin depnding on model. The simply drive the truck slowly forwards until the carriage top rail contacts the backplate just below the top hangers, lift the carriage slowly until a snug fit is achieved. Then simply re-fit the bottom hangers and the jib is now ready for use. Please note, stands and quick release models are available.

High Lift jibs are the standard jib for mounting directly onto a truck carriage. Supplied with hook & shackle. Revised beam profile allows access in confined spaces.
