

# Hydraulic Drum Stacker (FDH Series)

The Hydraulic drum stacker is designed to allow drums to be safely lifted, transported and tilted to eliminate the need for manual drum handling, thus reducing the risk of injury whilst increasing Health & Safety. With 120 degree forward tilt, 55 gallon drums can be emptied with ease, and locked into either the vertical or horizontal position for transporting. The FDH-DA40B-DTRU model also allows fibre and cardboard drums to be handled

Model Ref	Capacity (kg)	Lifting Height (mm)	Forward Tilt (degrees)	Drum type (210 litre)	Weight (kg)
FDH-DA40B	400	1350	120	Steel & Plastic	190
FDH-DA40B-DTRU	400	1350	120	Steel, Plastic, Fibre, Cardboard	230

## The perfect solution to drum lifting and drum turning

- ✓ Easy to lift, transport and tilt 210 drums
- ✓ FDH-DA40B Available to carry drums to racking (lower than 1350mm)
- ✓ FDH-DA40B-DTRU suitable for use with all types of 210 litre drums
- ✓ Tilt the drum 120 degrees to empty drum
- ✓ Compact & reliable mechanism system to fix on to drum
- ✓ FDH-DA40B Suitable for locking drums in the vertical or horizontal position
- ✓ Position for draining through a faucet

FDH-DA40B-DTRU
