

Hydraulic Drum Truck (FDH Series)

The hydraulic drum truck offers the ideal solution to low cost 'stand alone' drum handling. With hydraulic lift, this drum truck can effortlessly pick up 210 litre steel drums, and with oversized rollers, manoeuvrability can be done with ease. When the drum has been transported to its desired location, a simple pressure release handle allows the drum to be smoothly lowered to the ground. The hydraulic drum truck helps to eliminate manual handling of drums and comes fully tested and certified for compliance to the latest Health & Safety Regulations.

Model Ref	Capacity (kg)	Drum Size (Litre)	Maximum Lift Height (mm)	Weight (kg)
FDH-DT250	250	210	300	45

Quick & Simple Drum Handling

- ✓ Ideal for lifting and transporting 210 litre drums
- ✓ Easy movement of drums via large roller wheels
- ✓ Locking mechanism grips to top of drum safely & securely
