

Straddle Leg Drum Lifter (FDH Series)

The hydraulic drum truck with straddle leg design is suitable for loading and unloading drums off the floor/pallets with a maximum width of 850mm. Two rigid castors wheels at the front and one locking swivel castor at the rear provides effortless drum moving, whilst the simple design with a manual mechanical hand ratchet crank lift mechanism allows efficient drum lifting capabilities. An ideal drum truck for lifting and transporting steel drums with a top lip. The hydraulic drum truck will come fully tested and certified to comply with the latest Health & Safety Regulations.

Model Ref	Capacity (kg)	Drum Size (Litre)	Drum Type	Lift Height (mm)	Weight (kg)
