

This pedestrian push along salt spreader is ideal for ensuring pathways, walkways and access ways are gritted for ice.

With large pneumatic tyres for easy movement, and a 50kg capacity non-corrosive hopper, this pedestrian salt spreader will help ensure your operations keep moving during the winter months

Model Ref	Capacity (litres)	Weight (kg)
PPS-50L	50	18

Features & Benefits

- Non corrosive 50kg hopper
- Substantial flow regulator for easy operation, powered by heavy-duty stainless steel gears for added strength
- Large 330mm pneumatic tyres for easy movement
- Solid control linkage eliminates sticking and stretched cables
- Fitted with deflector plates to control spread pattern, making ideal for gritting pathways
- One piece fully welded steel frame with ergonomic handle for easy pushing
- Durable plastic rain cover to protect salt from moisture and spillage

Suitable for use with dry white rock salt only
