

Magnetic fork covers are ideal for handling a wide variety of loads where product damage from handling with steel forks needs to be avoided.

Simply fitted to the fork blade in a matter of seconds, the magnetic fork covers allow awkward or slippery products such as barrels, metal boxes or cages to be handled safely whilst providing extra stability and reducing potential product slippage on the forks.

Model Ref	Upper Layer	Inner Core	Bottom Layer
MFC-DAGS	Rubber	Metal	Magnetic

Features & Benefits

- Easy to install or remove in seconds without any mechanical or electrical work
- Sticks securely to the forklift forks
- 70 durometer (shore A) black rubber upper layer, a metal inner core and a bottom magnetic layer
- Resistant to abrasions, atmospheric agents and oils
- Rib design provides additional coefficient of friction
- Stores within easy reach of any flat surface on the forklift
- Lightweight - does not limit forklifts net capacity
- Improves noise reduction
