

Easi-SWEEP¹⁸⁰⁰

Fork Mounted Sweeper (ES-1800 Family)

The **Easi-Sweep** forklift sweeper is a durable and versatile sweeper that can be used for a multitude of tasks.

With a pressed 3mm steel body and 5, 8 or 11 rows of 1800mm wide durable polypropelene bristles the sweeper is robust enough to cope with a suprising workload whilst still maintaining a clean pass. With the option for replacement bristle kits the sweeper really is the most cost effective sweeping solution on the market!

Debris that can be swept include snow, gravel, sand, leaves and much more.

The unit simply sits on the tip of the forks and secures via screw clamps, and any forklift becomes transformed into a sweeper. Models also availible with full fork pockets and retention behind the fork heel.

The Easi-Sweep offers the following advantages just to name a few:

- Highly durable
- Manufactured by the "Quality Leader"
- Generates minimal dust
- Can be used on bulky materials
- Will 'squeegee' wet surface
- Most cost effective sweeper on market
