

Telehandler Tow Hitch (TELE-THBP)

This telehandler tow hitch has been designed to allow a telehandler to be able to tow objects using a tow ball/Pin. Ideal attachment for allowing your telehandler to tow trailers.

The telehandler towing hitch is mounted to the telehandler via brackets and allows the telehandler to either shunt or pull the item into place. Supplied with a ball hitch & pin coupling. Standard length to ball is 1200mm.

Please be aware, towing via a telehandler should be considered carefully, and you should consult your telehandler manufacturer to discuss your reasons for towing and confirm the truck suitability.
