

Why buy Contact's Cross Beam Jibs ?

No Quibble Guarantee:

If you are dissatisfied in any way with your Contact cross beam jib's performance, return it to us, and we will refund you in full.

Tested & Certificated:

All Contact's forklift cross beam jibs are 'CE' marked, fully tested and and come supplied with Certificates of Conformity for compliance with Health & Safety regulations.

Dual Function:

With the capability of Contact's cross beam jib being used as both a forklift jib and a forklift spreader beam, long or wide loads can be safely handled width ways or length ways with ease.

Long Reach:

With a fixed beam length of 2000mm, Contact's cross beam jib, whether used in the jib arm position or the spreader beam position, offers long reach capabilities.

Easy Fitment:

With simple 'drive in' operation, Contact's cross beam jib makes fitting to the forklift truck a one man operation. This can greatly speed up productivity whilst reducing downtime.

Secure Fastening:

To make sure Contact's cross beam jib is safely secured to the fork truck, safety securing chains come fitted as standard.

High Quality Hooks:

In keeping with the forklift cross beam jibs high specification, high quality Grade 10 lifting hooks (two) with load bearing swivel action are fitted as standard.

We hope the above helps demonstrate the quality and safety aspects of a Contact forklift cross beam jib, and in doing so, welcome the opportunity to supply you with a high quality lifting jib and spreader beam that will assist in your load handling operations.
